

T-JACK®

simply unearthly

simply unearthly

# innovative

## The all-season tee

The patented T-JACK is the last word in all-season tees, offering many advantages over other tees regarding materials, handling and usability. Ordinary tees made of wood, plastic or recycled biomass are either not particularly durable, or they might damage golf clubs or mower blades. Also, ordinary tees cannot be adjusted for height, or if they are, only with a lot of difficulty.

## Light and height adjustable

T-JACK is different: its low weight (2.4 g) and unique design mean that it will stay near the tee-off point and will also be easier to find due to its form.

The tee can also be adjusted for individual height due to its angular construction, giving the golfer the best position to tee off from every time.

## The Allround Tee

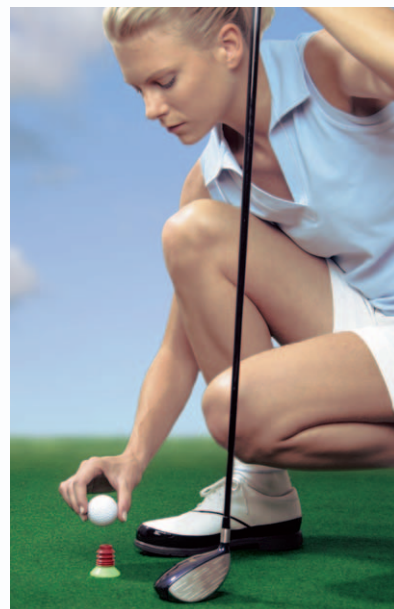

T-JACK works in extreme conditions, such as on hard or frozen ground, loose sand and uneven surfaces, since it does not need to be stuck into the ground.

## Balm for your driver

T-Jack is harmless to golf clubs since your driver will not strike an object that is anchored into the ground. The carefully selected materials used ensure that no harm will come to the impact surface of the driver.

- Height adjustable in steps
- Exact height reading
- Hi-tech plastic – very light in weight
- No chipping on the driver surface
- Does not fly very far when hit – easy to find
- Stands firm, even on hard or loose ground
- Modern design

## Teeing-off – with comfort

T-JACK's ball holder is vastly simplified due to its increased size. The surface matches perfectly with the surface contours of the golf ball, holding it steady.

## Unique design

T-JACK can be taken apart, and the base itself can also be used as a tee. This means that the lowest tee-off height above ground is exactly 12 mm. The highest tee-off height is 50 mm, fulfilling the requirements of amateur and professional golf. Once worn, the ball holder is simple to replace.

# striking

- Patented world novelty design
- Conspicuous form – high advertising impact
- High product usage benefit – positive advertising environment
- Wide variety of colour combinations
- Cost effective production price
- Will reach your target group, even in their leisure time
- Large printing area (approx. 13 sq cm)
- Modern design

## High advertising impact

T-JACK is the ideal advertising giveaway for companies, golf clubs and hotels, publishing houses and many other types of business. This innovation is unique in the world and is bound to attract attention. The special technology used, the unusual design, and intensive use of the T-JACK when playing golf will ensure that this is an advertising idea that your target group will remember. This makes T-JACK a welcome alternative to the plethora of tired old advertising ideas in golf.

## Getting your message across

The almost 13 sq cm area on the T-JACK base offers ample room for printing your company logo and claim. T-JACK's two-part design means that the angular construction can be unscrewed from the base and replaced, and your logo will last since the base can be used again and again.

## Flexible and colourful

The cleverly designed T-JACK tee can be separated into two parts. This enables a huge number of colour combinations from a wide-ranging colour catalogue for you to match the tee to your corporate design.

Subject to change without notice.
